- Talex Rzeszów, ul. Powstańców Listopadowych 3;
- Talex Szczecin, ul. Pomorska 53;
- Talex Warszawa, ul. Olbrachta 94;
- Talex Wrocław, ul. Bierutowska 57/59;

Field of activity

The joint-stock company TALEX S.A. (previously the limited liability company TALEX Sp. z o.o.) has been a provider of technologically advanced IT services for small and medium-size businesses since 1990.

The Company's activity focuses on three main areas: integration of ICT systems, IT outsourcing and software development.

The integration of ICT systems includes a large number of services. The Company tries to provide its clients with a full range of services, starting with preliminary analyses and expert consultation, project design and management services, development and introduction of integration procedures, system configuration and tuning, ending with the organisation of staff training programs, whose focus are the products and services offered by the Company. Such an extensive offer guarantees the integrity of the customers' IT systems as well as high quality, reliability and adherence to the basic security standards.

The platforms covered by the integration services offered are Intel/RISC, i5/OS, Windows and Linux. The services include, among other things, consolidation and virtualisation, high-availability solutions (clusters), recovery services (recovery centers, data replication, backup) as well as information security solutions - preventing and reacting to unauthorized intrusions into ICT networks and building private virtual networks. The Company also provides network integration services, including DWDM, IP telephony, structural wiring, network monitoring.

The outsourcing offer focuses on two main areas – Data Center services and services guaranteeing continuity of business processes. Talex S.A. provides its customers with the access to its own Data Center. These services are offered in a few models, such as colocation, lease of dedicated IT infrastructure, cloud computing, and provision of access to complete business applications. At the customer's request, IT infrastructure and

application software can be monitored 24/7. Talex S.A. has two centers of data processing – Data Center in Poznan and in Wroclaw. Data Center in Poznan has an area of over 2200 m², and the DC in Wroclaw has an area of 800 m² at its disposal. Currently, Talex S.A., as the only company in Poland, can offer its customers Data Center services certified in accordance with the European standard EN 50600, both in Poznan and Wroclaw.

As part of business continuity services, Talex S.A. provides its customers with Data Center backup services, backup offices covering office space equipped with the necessary IT infrastructure, integrated with the customer's systems, and the Network Operation Center services 24 hours a day that monitors teletransmission networks, IT devices and applications.

The company provides Contact Center services in the scope of recording and handling incidents and HelpDesk services in the area of supported IT technologies. These services are certified in accordance with the requirements of EN 15838:2009. The company also provides services in the scope of installation, relocation, changes and removal of IT hardware and software, including mass replacement of ICT infrastructure at large customers, especially those with branches scattered throughout the country, and failure removal services in the customer's IT environments. The management of maintenance services in Talex S.A. is certified for compliance with the requirements of the ISO 20000-1:2011 standard.

The software production services include custom-made software, developing modules extending the existing applications, tuning the applications to the specific needs of customers or developing codes used in integration processes. Software produced by the Company is used in financial institutions, state-owned enterprises as well as large industrial companies.

TALEX S.A. is a partner of many leading hardware and software manufacturers. The Company's employees have attended training courses and passed exams, which is confirmed by obtained certificates. Procedures of all the activities of the Company are compliant with the quality management system, defined by the ISO 9001:2000 standard. Given its specific business profile and the importance of its customers, the Company also obtained the ISO 27001:2005 certification, which confirms that the procedures followed by the Company guarantee full security of customers' data, and also the ISO 20000-1:2011 certificate confirming that the management of IT services, in particular the services provided by the Company in the scope of installation, relocation, expansion, changes, removal of hardware and software, and removal of hardware and software for the Company's business partners, complies with this international standard.

IT market and perspectives of development for the Company

Market experts cautiously indicate that the year 2021 should bring an upturn after a noticeably weaker 2020. Gartner analysts estimate that the decline in turnover on IT market settled at 3.2% compared to the year 2019.

Gartner experts indicated earlier this year that 2021 should primarily bring significant growth in the software segment, at the level of nearly 9%. Similar estimates were for growth in the IT hardware market, at 8%. Whereas, growth in the segments of data center services and IT services was estimated at 6% each. The presented estimations were given by analysts with great caution, expecting higher growth dynamics in 2022. The first half of this year confirmed that the analysts' cautious predictions may be corrected, in fact, the growth dynamics may be noticeable later, in the following year.

Market experts also point out that the shift towards IT services is perceived by companies as one of the most significant methods of cost optimization. This is particularly important in a period of forecasted economic slowdown and cost-cutting pressure on companies related to it.

IT market experts also forecast an increase in revenues generated by implementations of blockchain technology, development of the Internet of Things solutions, as well as significant progress in the field of analysis of large data streams using algorithms, machine learning and artificial intelligence.

According to PMR, one of the most important trends in IT outsourcing in Poland in the coming years will be the increase in popularity and use of cloud services. Cloud storage, mobility and the Internet of Things have for years been described as breakthrough technologies. For the current generation, cloud storage and mobile solutions are completely natural. Everything points to the fact that Software as a Service becomes a model so ubiquitous that soon any software will be delivered through the cloud, regardless of its purpose and functionality.

The departure from the maintenance of private Data Centers is also a significant direction of developments in the market. Gartner's estimates indicate that already in the next 5 years approx. 80% of companies in the world will eliminate their own Data Centers and will search for the necessary space and computing power for their data in professional Data Centers. This direction is dictated not only by economic and technological aspects, but also to ensure the security of stored and processed data.

The Company intends to consistently continue to focus its activities on: outsourcing, integration services in the field of information technology and software production. Treating outsourcing services as one of the strategic directions of development, the Company is consistently, for several years, developing the necessary skills and technical infrastructure.

Factors affecting the results achieved by the Company in the next quarter include primarily the implementation of contracts with regular, long-term customers of the Company, in particular with the clients from banking and financial sectors such as Santander Bank Polska S.A., Credit Agricole Bank Polska S.A., and PKO Bank Polski S.A. as well as with the clients from other sectors, including Grupa Allegro Sp. Z o.o., Eurocash S.A., and Volkswagen Group Polska Sp. Z o.o.

In the coming years the market of cloud services shall be more focused on applications available in the cloud rather than on the infrastructure itself. Surely, we will face the optimization of the costs of cloud operation and the use of cloud by the companies. It is necessary to better manage the performance and monitor costs. The cloud is a normal business product and has to meet the criteria of the product to be offered, among others, to banks, which means it has to be governed by the specific licensing legislation, be effective and have a determined price.

At the same time, the Company pays particular attention to the sanitary and epidemiological situation related to the coronavirus COVID-19 pandemic, both in Poland and abroad. In the opinion of the Company, the impact of the pandemic on the Company's market environment is noticeable. In the current year the Company has noted changes in the purchase decisions of its customers, in particular a decrease in the volume of orders. The Company's ongoing and undisturbed operation is possible, inter alia, through the provision of means of communication for remote work, without prejudice to safety standards. Moreover, the Company's activities, with special regard to services, are carried out using fully redundant, two independent Data Centers located in Poznan and Wroclaw. In the Company's opinion, due to the atypical situation related to the COVID-19 pandemic and a very wide geographical area affected, it is currently

difficult to predict how this situation will affect the economic condition and future business decisions of the Company's customers and the market. Still, with regard to the functioning of the Company itself, it should be emphasized that a significant part of its revenues comes from long-term IT outsourcing contracts, which significantly affects the stability of the Company's operations.

Expenditures on fixed asset of the Company in the first half of 2021

In the first half of 2021, the Company incurred a total expenditure on tangible fixed assets and intangible assets in the amount of PLN 1,5 million.

SPECIFICATION	Expenditures incurred in the first half of 2021 (PLN in thds)
Modernisation of the Company's buildings	34
Investments in rented properties	200
Purchase of technical equipment and machinery	142
Purchase of technical equipment and machinery – covered by finance leases	404
Purchase of other fixed assets	30
Purchase of means of transport from lease	1
Intangible assets (software)	57
TOTAL	868

The Company incurred the largest expenditures on the purchase of technical equipment and machinery.

Plans for increase and maintenance of tangible fixed assets in the second half of 2021

Plans for the second half of 2021 include further expenditures for the renewal and supplementation of technical equipment necessary for the provision of IT services.

Specification:

- Purchase of technical equipment and machinery	PLN 300 thousand
- Investments in rented properties	PLN 50 thousand
- Other fixed assets	PLN 100 thousand
- Intangible assets	PLN 50 thousand

TOTAL **PLN 500 thousand**

Basic economic and financial data, disclosed in the semi-annual financial report

Sales and profit in the first six months of 2021

In the first six months of 2021, the Company recorded the sales revenues of PLN 36,145 thousand, with the net profit of PLN 3,608 thousand (in the first half of 2020 the sales revenues were equal to PLN 42,529 thousand and the net loss of PLN 202 thousand).

SPECIFICATION	First six months of 2021 (PLN in thds)	First six months of 2020 (PLN in thds)	Fluctuation
Revenues from sales of products	24,229	25,716	94.2%
Revenues from sales of goods and materials	11,916	16,813	70.9%

In the reporting period, the revenues from sales were lower by over 5% than the revenues in the last year. The revenues from sales of products decreased significantly i.e. by almost 30%.

In the analysed period the share of services in sales revenues constituted 67%; in the comparable period of the first half of 2020 it accounted for approximately 60% of total sales revenues. The margin on the sale of those services decreased to the level of 19%, and in the first half of 2020 year and was equal to 23%.

Revenues from sales of goods and materials accounted for 33% of total sales revenues (in the first half of 2020 they accounted for almost 40%), with the profitability of almost 11% (11% in 2020).

SPECIFICATION	First six months of 2021 (PLN in thds)	First six months of 2020 (PLN in thds)	Fluctuation
Net revenues from sales	36,145	42,529	85.0%
Gross profit from sales of products	4,614	5,988	77.1%
Gross profit from sales of goods and materials	1,281	1,910	67.1%
Gross profit (loss) from sales	5,895	7,898	74.6%
Costs of sales	2,576	2,697	95.5%
General management costs	6,985	7,387	94.6%
Profit (loss) from sales	-3,666	-2,111	173.7%
Profit (loss) from operating activities	-3,371	-111	3 036.9%
Gross profit (loss)	-3,487	-226	1 542.9%
Net profit (loss)	-3,608	-202	1 786.1%

Sales revenues in the first half of 2021 decreased by 15% compared to the first half of 2020; similarly, the margin on sales decreased from 19% to 16%. In consequence, the Company achieved lower gross profit on sales than in the corresponding period of 2020. Due to the lower number of orders recorded by the Company in the reviewed period, despite the reduction in the cost of sales as well as general and administrative expenses, the loss on sales in the first half of 2021 is higher than in the same period last year.

Company assets

The value of fixed assets as at 30.06.2021 amounted to PLN 58,013 thousand and decreased by almost 10% compared to the value at the end of the first half of 2020. The reduction in value was influenced mainly by lower expenditures on the purchase of new tangible assets compared to the planned depreciation.

	ASSETS	30.06.2021 (PLN in thds)		30.06.2020 (PLN in thds)	
		(PLN thds)	% of share	(PLN thds)	% of share
I	FIXED ASSETS	58,013	80.53%	61,691	78.90%
1.	Intangible assets	416	0.58%	470	0.60%
2.	Tangible fixed assets	57,228	79.44%	60,902	77.89%
3.	Long-term receivables	-	-	-	-
4.	Long-term investments	-	-	-	-
5.	Long-term prepayments and accrued income	369	0.51%	319	0.41%

The value of current assets as at 30.06.2021 amounted to PLN 14,025 thousand and was lower in comparison to the value at 30.06.2020. The greatest share in the current assets constituted short-term receivables. The Company collected on the bank account the amount of PLN 2,660 thousand, the amount slightly higher than the one in the analogous period in 2020.

	ASSETS	30.06.2021 (PLN in thds)		30.06.2020 (PLN in thds)	
		(PLN thds)	% of share	(PLN thds)	% of share
II	CURRENT ASSETS	14,025	19.47%	16,499	21.10%
1.	Inventories	795	1.10%	809	1.03%
2.	Short-term receivables	9,642	13.38%	13,145	16.81%
3.	Short-term investments	2,660	3.69%	1,705	2.18%
4.	Short-term prepayments and accrued income	928	1.29%	840	1.07%

Current assets constituted about 19.5% of the total assets of the Company as at the end of the first half 2020 (in 2020 it was equal to 21%). This ratio indicates the potential of the company. The higher this part of the index, the higher the liquidity of the Company. Current assets compared to tangible current assets are much more easily converted into cash.

Overall financial condition

Selected financial ratios.

Profitability ratios	1st half of 2021	1st half of 2020	Desired quantities
Return on sales (ROS) Net profit/sale value *100 (%)	-9.98%	-0.47%	positive rising
Return on assets (ROA) Net profit/sale value *100 (%)	-5.01%	-0.26%	positive rising
Return on equity (ROE) Net profit/own equity *100(%)	-7.12	-0.38%	positive rising
Adjusted return on assets Net profit + (financial costs – income tax of the finance costs)/ assets*100(%)	-4.84%	-0.02%	positive rising

Leverage			
Profitability of equity – profitability of assets	-2.11%	-0.13%	positive rising

The return on sales (ROS) informs about the amount of profit margin in the percentage of sales after deduction of costs and taxes. A higher level of this ratio indicates a more favorable financial condition of the company.

The return on assets (ROA) shows the ability of the entity to generate profit. The higher the level of return on assets, the better the company's financial situation

The return on equity (ROE) indicates the size of the net profit per unit of capital invested in the company. The higher the efficiency of the equity, the better the financial situation of the Company, and the possibility of paying higher dividends.

Leverage indicates whether the operating profit generated by foreign capital is higher than the interests that is whether the company earns money for itself due to the external funding.

Positive leverage occurs when the profitability of the whole capital (equity and foreign) of the company, calculated as the relation between the operating profit and total capital, is higher than the interest rate on debt (foreign capital).

The net loss generated in the first half of 2021 resulted in deterioration of the profitability ratios.

Liquidity ratios	1st half of 2021	1st half of 2020	Desired quantities
Financial liquidity ratio I Current assets / short-term liabilities	1.15	1.05	1.2 – 1.8
Financial liquidity ratio II (current assets- inventories)/short-term liabilities	1.08	1	0,8 -1.0
Financial liquidity ratio I short-term investments/ short-term liabilities	0.22	0.11	Min. 0.3

In the first half of 2021 the values of liquidity ratios slightly increased. The cash balance is sufficient for the current payment of liabilities. In order to ensure liquidity , the Company additionally uses credit lines in current accounts.

Debt ratios	1st half of 2021	1st half of 2020	Desired quantities
Overall debt ratio Liabilities and provisions for liabilities/total assets	0.21	0.25	Max 0.5
Long-term debt ratio Long-term liabilities/equity capital	0.06	0.08	Max 0.5-1

Total debt ratio decreased at the end of the first half of 2021 compared to the previous year but has been still at the safe level.

The deadlines for the repayment of receivables and the maturity of short-term liabilities allow the Company to maintain its liquidity at a safe level. If necessary, the Company may mobilize funds from current credit lines.

The long-term debt results from the car fleet lease agreements and IT equipment agreements.

Management performance indicators	1st half of 2021	1st half of 2020	Desired quantities
Receivables turnover ratio Net sales revenues /average receivables	2.67	3.75	7-10
Inventory Cycle Average inventory cycle/ cost of sales *360	5.43	7.97	decreasing
Receivables Cycle Average receivables /cost of sales * 360	67.50	47.94	decreasing
Duration of receivables in days Average trade receivables /cost of sales*180	42.03	22.77	average maturity date
Conversion period of working capital into cash Receivables cycle + inventories cycle (in days)	72.93	55.91	decreasing

The low level of receivables turnover ratio, that is below the value of 7, indicates that the level of debt is high, meaning that the company is crediting its customers excessively, which in practice means a long-term freezing of funds in receivables. In the first half of 2021 the Company managed to raise the value of this ratio to the desired optimum level in comparison to the first half of the previous year.

The inventory cycle indicates the average number of days that have passed since the introduction of inventory to the warehouse up to its leave. The shorter time for the equity in the asset, the better.

The receivables cycle increased in relation to the data in the first half of 2021, indicating that the waiting time for repayment of debts has extended. This ratio does not exceed by more than half the deadline described in the terms of sale. The Company monitors the status of receivables repayment on an ongoing basis. In the reported period, no significant delays in the repayment of receivables were noted.

At the same time, similarly, the duration time of receivables in days extended from 23 days in the first half of 2020 to almost 42 days in the first half of 2021. The extension of the payments period is commonly used as a form of interest-free credit, which is particularly useful in case where the Company give credits to its customers, determining the extended payments terms.

The analysis of these indicators shows the good overall efficiency of the Company's operations in the first half of 2021. Talex has proper financial liquidity and the profitability and turnover ratios also remain at a good level.

Financial standing

The Company's shareholders' equity as at 30.06.2021 amounted to PLN 50,702 thousand, which comprised

- | | | |
|----------------------------------------------|-----|-----------------|
| • share capital (3,000,092 shares) | PLN | 3,000 thousand |
| • reserve capital | PLN | 51,309 thousand |
| • net profit/loss for the first half of 2021 | PLN | -3,608 thousand |

The Company's standing, in terms of payments, was good in the first six months of 2021. Despite an unusual situation caused by the COVID-19 pandemic, there were no significant difficulties with the timely payments of taxes, social insurance or payments to employees and suppliers. The Company has timely repaid all of its current account loans. The amount of the cash at hand and in the bank accounts of the Company increased in comparison to the previous year, and the Company's funds and concluded long-term agreements secure the current needs of the Company.

Total liabilities as at 30.06.2021 amounted to PLN 15,293 thousand, which comprised 30% of shareholders' equity, with the fact that the amount of liabilities includes long-term lease agreements.

The Company uses working capital loans and at the date of 30.06.2021 the amount of short-term liabilities on this account amounted to PLN 2.2 million.

The Company will continue to finance its activity through the shareholders' equity. Current liabilities will be paid with the Company's current receivables.

Information on buying treasury shares

As at the day of 30 June 2021 the Company did not hold any own shares.

Financial risk management

The Company partially finances its current operations using bank loans. Liabilities on account of credits are subject to interest based on variable interest rates. The Company is exposed to the risk of interest rate changes. A potential increase in interest rates may cause an increase in financial costs, which will have a negative impact on the financial results achieved by the Company. The Company monitors the level of interest rates on a current basis.

The risk related to changes in foreign currency exchange rates against the Polish zloty for Talex was low in the analyzed period. Although the Company did not use the services of financing entities, hedging against foreign exchange risk, it also did not make any significant purchase or sale of currency. The majority of payments of liabilities in foreign currencies was made by the Company from receivables received from the recipient in that currency. In the first half of 2021, payments in foreign currencies accounted for 13.5% of all payments, and the Company recorded a loss of PLN 24 thousand on financing activities in the area of foreign exchange differences.

Due to the Company's good liquidity, Talex can make decisions concerning the sale of currencies in a convenient time.

Employment

On 30.06.2021, the Company had 314 employees. The average employment in the first half of 2021 expressed in full-time jobs equalled 323.82.

Significant risk factors and threats

Risk associated with economic situation

The constant economic and political changes may constitute a source of both threats and opportunities for businesses in Poland. The elements of the country's economic policy most significant for business are employment costs, taxes and investment policy. The key macroeconomic factors include the level of GDP, investment, inflation and exchange rates – especially USD and EUR. The poor state of the economy, and so, poor state of businesses, may result in the decrease of investments, including ICT solutions. Lower demand for such products may cause shrinkage of the market and increased competition resulting in reduction of prices. This may influence the reduction of sales profitability and in longer term also the liquidity of companies operating in this sector.

Risk associated with competition

The Company operates in a sector, where one needs to face intense competition, both from domestic businesses, which have been operating on the market for years, as well as new businesses. The growing number of the latter is a result of, among other things, open borders and the influx of foreign businesses operating in the same sector. Those businesses try to take over part of the market by taking over small domestic companies. Another significant threat is the growing tendency to provide direct services by global suppliers of computing solutions, who, so far, have operated in Poland through domestic integrators. The strengthened position of the rival businesses may weaken that of the Company. The Company's activities which are to minimize the above risks involve constant expanding of the offer by the newest technological solutions, raising the qualifications of the staff as well as providing services, whose standard guarantees that the Company is perceived as professional, experienced and reliable.

Risk associated with supplier dependence

The Company has signed partnership agreements with numerous global IT corporations. In most cases, those corporations offer solutions similar in quality, function and price. The Company also cooperates with many domestic distributors of IT products. As a result, most of the solutions offered by the Company may be based on alternative products provided by different suppliers. However, part of the company's offer is based on products that are unique. The need to use particular manufacturer's products may sometimes be determined by specific requirements of a client. If the Company ceased to cooperate with particular corporations in the IT sector, it could lose the opportunity to sign certain agreements.

Risk associated with large customer dependence

According to the strategy of the Company's commercial operations, large part of the Company's activities is based on regular, long-standing and extensive IT services provided to large businesses. The strategy involves unquestionable benefits but also the risk that, in case of losing certain important customers, the Company will face a temporary reduction of revenues or even the need to reorganize certain areas of its activity. To minimize this risk, the Company tries to increase the number of its key customers and generate part of its revenues by cooperating with many small contractors.

The risk associated with providing solutions and services of crucial importance for the customers' business activities

The Company's customers deem a considerable number of the solutions and services provided by Talex highly important for business processes. Any defects in the solutions provided by the Company or inappropriate implementation of the services offered may lead to considerable losses on the part of the customer or, in some cases, make it impossible for the customer to conduct their basic business activities. In such cases, the Company may have to pay the financial penalty and damages specified in the agreements and lose some of its customers. To minimize this risk, the Company includes provisions of its limited liability in the agreements and signs insurance agreements with insurance companies.

The risk associated with losing key employees

Given the open job market in the countries of Western Europe as well as the growing demand for the ICT experts in the foreign businesses operating in Poland, the Company may lose many of its highly qualified employees. If the Company lacked employees with specialist qualifications, it could lose some of its certificates and entitlements. Also, the standard of the services provided by the Company could fall. Therefore, the Company offers a variety of incentives, both financial and non-financial, for example, specialist training courses on the newest information technologies, where employees can improve their qualifications. As a result, the Company has not marked any significant loss of its indispensable experts for the last couple of years.

Basic products, goods and services

The sales of products and goods comprised 33% of total sales in the first six months of 2021. Their dynamics of this group equalled 71%. Revenues from the sale of services amounted to over PLN 24 million, which represents 95% of revenues from the sale of services in the first half of last year.

SPECIFICATION	First six months of 2021 (PLN in thds)	First six months of 2020 (PLN in thds)	Fluctuation
Revenues from sales of products	24,229	25,716	94.2%
Revenues from sales of goods and materials	11,916	16,813	70.9%

Installation and maintenance of IT environment constituted the largest share in the sale of services (35.1%), where the sales were recorded at a level similar to last year's. Subsequently, Data Center (31.6%), software related services (13.9%), outsourcing of IT services including the services of Service Desk, Backup Office and IT infrastructure monitoring (12.3%). In subsequent years the Company will further develop the sale of Data Center services but also the services related to broadly understood services of applications and IT equipment as well as installation and configuration of IT equipment which is the result of the agreements signed by Talex for this kind of services.

SPECIFICATION	First six months of 2021 (PLN in thds)	First six months of 2020 (PLN in thds)	Fluctuation
Installation and maintenance of IT environment services	8,511	8,493	100.2%
Data Center services	7,660	7,106	107.8%
Software related services	3,359	4,586	73.3%
Outsourcing of IT services	2,988	3,908	76.5%
IT integration	1,546	1,491	103.7%
Other services	165	132	124.7%
TOTAL NET REVENUES FROM SALES OF PRODUCTS	24,229	25,716	94.2%

The fluctuation rate of the revenues from sales of goods and materials equalled 70.9% at the end of 1st half of 2021 and almost entirely relates to wholesale of computers, peripheral equipment and software.

SPECIFICATION	First six months of 2021 (PLN in thds)	First six months of 2020 (PLN in thds)	Fluctuation
----------------------	---------------------------------------------------	---------------------------------------------------	--------------------

- wholesale of computers, peripheral equipment and software	11,914	16,801	70.9%
- remaining out-of-shop retail sales	2	12	16.7%
TOTAL NET REVENUES FROM SALES OF GOODS AND MATERIALS	11,916	16,813	70.9%

Markets and sources of supply

In 2021, the Company sold goods and products only on the Polish market.

Sales revenues by geographical location:

SPECIFICATION	First six months of 2021 (PLN in thds)	First six months of 2020 (PLN in thds)	Fluctuation
Net revenues from sales of products:	24,229	25,716	94.2%
Poland	24,229	25,716	94.2%

The Company is not dependent on the suppliers to any great extent. In particular, goods and products purchased by the Company from suppliers trading with whom comprises the turnover of approximately 10% of the total value of supplies, can be purchased from alternative distributors on similar purchase terms.

The Company does not have any formal relations, other than commercial settlements, with recipients or suppliers whose share exceeds 10% of the total sales income.

Information on agreements significant for the issuer's activity

In the first half of 2021 the Company was in the process of negating conditions of the agreements, conclusion of which could have been announced by the Company in the first days of in the first days of the second half of this year:

- On 2 July 2021 the Company became aware of the conclusion of the agreement with Powszechna Kasa Oszczędności Bank Polski S.A. with its registered office in Warsaw (Bank). The agreement was concluded for a period of 3 years. The subject of the agreement is the provision of technical and maintenance services for IT hardware and software used in organizational units of the Bank, Bank Agencies, and selected units of the Bank's Capital Group in Poland. The total estimated gross value of services provided under the agreement within 3 years (the value of the agreement) amounts to PLN 14.3 million. The total actual value of the agreement depends on the number of services ordered on the basis of the agreement.
- On 19 July 2021 the Company became aware of the conclusion of the agreement with Toyota Motor Poland Limited Sp. z o.o. with its seat in Warsaw. The subject of the agreement is provision of IT services with the use of Talex Data Center infrastructure. The agreement was concluded for the period of 5 years with the possibility of its extension for an indefinite term. The estimated net value of the agreement in the period of 5 years is EUR 2.06 million

In the first half of 2021 the Company continued to realize a number of orders obtained from its strategic customers from banking and financial sector. Moreover, the Company received a number of further orders, about which Talex informed in the current report published in the first days of the second half of 2021:

- In the period from 11 December 2021 (publication of the current report No. 21/2020) to 16 July 2021 (publication of the current report No. 11/2021), the Company obtained a number of further orders from Santander Bank Polska S.A. with its seat in Warsaw. The total net value of the received orders is PLN 6.44 million.

Information on credit and loan agreements

In the first half of 2021 the Company renewed the MULTILINIA agreement with Santander Bank Polska S.A. under which the Bank left PLN 3 million available for the Company to use as the working capital facility. As at 30.06.2021 this credit line has not been drawn down.

Also, in the first half of 2021, the Company concluded a multi-purpose credit limit agreement with Credit Agricole Bank Polska S.A. The maximum amount of debt due to the use of the limit is PLN 4 million. As of 30.06.2021, PLN 2.26 million shown under current liabilities was used.

Information on loans, sureties and guarantees granted

The Company has the contingent liabilities under due contract performance guarantees and sureties issued and payment guarantees granted by the funding bank, amount to PLN 1,021 thousand. Those liabilities are secured with capped mortgage on the Company's headquarters building.

Contingent liabilities included guarantees on account of due contract performance bonds and bonds on account of warranty and guaranty. Among the guarantees issued as of the day of 30.06.2021r. almost 22% were due contract performance bonds. The purpose of those bonds is to secure the claims which could arise in the case of improper performance of an agreement. Over 78% as at the last day of June 2021 were the bonds on account of payment guarantee.

As a security to the renewed contract on the limit for bank guarantees, granted to the Company by Santander Bank Polska S.A., the Company created a contractual mortgage, established by a notarial deed, up to the amount of PLN 10 million, on account of Santander Bank Polska S.A., headquartered in Warsaw. The mortgage was created on the real estate owned by the Company, registered in the Land Register kept by the District Court in Poznan – Stare Miasto in Poznan, under the entry no. KW P01P/00137.699/9. The real estate in question comprises a plot of 14.744.00 sq. meters, with an office building with a useable floor area of 8,470 m².

Assessment of financial assets management

Total	3,000,092	100.00	3,408,092	100.00
Janusz Gocałek	758,793	25.29	894,793	26.25
Jacek Klauziński	758,793	25.29	894,793	26.25
Andrzej Rózga	758,793	25.29	894,793	26.25

Information on the agreements known to the issuer, which may result in future changes in the present structure of share ownership in terms of shares held by current shareholders and bondholders

Management Board of the Company do not know any agreement which could result in future change in the proportion of shares held by existing shareholders. The Company does not emit bonds.

Information on holders of securities which entitle to special supervisory powers over the issuer

The Company did not issue any securities which entitle to special supervisory powers over the issuer.

Information on the system of controlling the employee share ownership schemes

The Company did not issue any employee shares.

Information on the limitations related to the transfer of ownership rights to the securities of the issuer and the exertion of voting rights in relation to the shares of the issuer

Only the shares of series A, B and D are subject to the limitation of the transfer of ownership rights. They are the registered shares and the shares of series A are preference shares regarding the voting right. The terms of conversion of those shares into bearer shares as well as of their disposal have been defined in par. 8 of the Company's Articles of Association. The shares of the Company are not limited as to the exertion of voting rights.

Information on agreements with an entity authorized to audit financial statements

On 19 June 2021 the Supervisory Board, acting under the Articles of Association of the Company, passed a resolution on the selection of the UHY ECA Sp. z o.o. sp.k. registered in Warsaw at ul. Polczyńska (01-337), as an entity with which the contract will be signed on auditing the financial statements compiled on 30 June 2021 and reviewing the financial statements prepared as at 31 December 2021, and also the review of the

Company's interim financial statement drawn up as at 30 June 2021, and the audit of the Company's annual financial statement drawn up as at 31 December 2021. The selected entity is recorded in the register of entities authorized to audit financial statements under the No. 3115 kept by the National Council of Statutory Auditors.

The total net value of auditors' remuneration due to execution of the above agreement with UHY ECA Sp. Z o.o. Sp. K. amounts to PLN 90 thousand.

In the analysed period the Company did not use the services of tax advisory.

Organization of the capital group of the issuer with the indication of the units subject to consolidation

The Company is not a member of the capital group.

Indicating the results of structural changes in the economic entity, including the results of merging economic entities, takeover or sales of members of the capital group of the issuer, long-term investments, division, restructuring and abandonment of business activity

During the presented period there were no changes in the structure of the economic entity.

Opinion of the Management Board on the feasibility of executing the forecasted results published earlier for a given year in the light of the results presented in the quarterly report in reference to the forecasted results

The board of the Company did not publish the forecast of the financial results for the year 2021.

Pending proceedings before courts, arbitration or public administration authorities

During the past quarter the Company did not commence and it was not a side in any court proceedings or public administration proceedings in relation to any liabilities of the value constituting at least 10% of its equity capital.

Information on conclusion of one or many transactions with related entities by the Issuer or its subsidiary, provided that the value of the transactions (the total value of all transactions concluded since the beginning of the financial year) exceeds the equivalent of EUR 500,000 in PLN

Since the beginning of the financial year, the Company has not concluded any transactions with related entities of total value exceeding the equivalent of EUR 500,000 in PLN.

Information on credit and loans sureties or guarantees granted by the Issuer or its subsidiary, to one entity in total or to its subsidiary, if the total value of existing sureties or guarantees is equal to at least 10% of the equity capital of the Issuer

In the presented period, the Company did not grant any sureties, credit, guarantees or loans of value exceeding 10% of the equity capital of the Issuer.

Other information which, in the opinion of the Issuer, is important for assessing its headcount, assets, financial standing and results, as well as movements therein, and information important to evaluate the fulfillment of the commitments the Issuer made

In the reporting period there were no changes that could have an impact on the personnel, wealth and financial situation as well as on financial results and their changes; there were also no events important to the assessment of the possibilities to fulfil the obligations of the Company.

Factors which, in the opinion of the Issuer, will influence the results of the Issuer at least in the next quarter

The future year's results will be affected by the incomes from executing the agreements with regular, long-term customers of the Company.

In the past half of this year the Company continued its activities related to the development and promotion of software offered by the Company. At the same time, the Company is making intensive efforts to obtain further large and permanent recipients of IT infrastructure maintenance and support services offered by the Company. Also, Talex has completed the investments related to equipping the Data Center and the new branch of the Company in Wrocław, which will have an impact on the future results of the Company.

The Company intends to finance its planned current purchases from its own resources. The schedule of planned current purchases has been arranged in such a way as to ensure that their implementation does not adversely affect the Company's liquidity and does not strain its financial condition.

In the Company's opinion, the sanitary and epidemiological situation related to the coronavirus COVID-19 pandemic both in Poland and abroad may significantly affect the overall market situation. All kinds of restrictions related primarily to the movement of people and goods in cross-border traffic will have an impact on the functioning of the economy. The Company is continuously fulfilling its obligations towards its customers using previously developed, regardless of the current situation, business continuity plans. The Company's ongoing and undisturbed operation is possible, inter alia, through the provision of means of communication for remote work, without prejudice to safety standards. Moreover, the Company's activities, with special regard to services, are carried out using fully redundant, two independent Data Centers located in Poznań and Wrocław. In the Company's opinion, due to the atypical situation related to the COVID-19 pandemic and a very wide geographical area affected, it is currently difficult to predict how this situation will affect the economic condition and future business decisions of the Company's customers and the market. Still, with regard to the functioning of the Company itself, it should be emphasized that a significant part of its revenues comes from long-term IT outsourcing contracts, which significantly affects the stability of the Company's operations.
